

AI-Powered Digital Mail Solutions for Modern Enterprises

Unifying Your Digital Ecosystem

Reinvent Your Enterprise

In today's digital landscape, organizations face the challenge of managing physical mail, a task that has become increasingly difficult with the rise of remote workforces. Whether your business is centralized, decentralized, or spans multiple locations, our digital mailbox solution empowers you to drive your enterprise forward.

You've Got Mail—We've Got You Covered

Datagain's Digital Mailbox streamlines and optimizes mail operations, converting traditional processes into efficient, digital workflows. By leveraging our global network and technology, we help you cut costs, enhance accuracy, and improve compliance, all while supporting your digital transformation.

How It Works

Our Digital Mailbox leverages advanced technology to automate the entire mail process, from receipt to delivery, based on your specific business rules. With our expertise, we manage the complexities so you can focus on achieving your business objectives and maximizing efficiency.

Key Features

Experience seamless mail management with these advanced capabilities designed to enhance productivity and efficiency.

Physical Mail Processing

We handle USPS and other mail types, processing them (open/sort/prep/scan), forwarding or securely disposing of non-business mail, and managing retrieval.

Scanning and Digitizing:

Document Imaging: Performed at our U.S. facilities, offering services like mail intake, digitization, and secure processing with strict regulatory compliance.

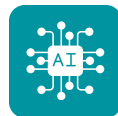

Data Extraction and Classification: Our Image Automation tool, with OCR accuracy rates of 99%+, efficiently processes typed and handwritten documents, ensuring high accuracy for structured and semi-structured content.

Digital Mailbox Service Platform: Our secure, enterprise-grade platform offers individualized or group digital mailboxes with functions like search, sort, view, forward, delete, save, and archive, plus email notifications. It integrates seamlessly with existing enterprise identity management systems.

Roles-based Access

Supports individual and group user access.

AI-Driven Workflows

Optimize and adapt workflows with AI, streamlining processes in real time.

Real-Time Updates

Your inbox instantly updates with scanned mail uploaded to the Datagain platform.

Mail Tracking

Each mail item is tracked to the image level with detailed reporting and audit features.

Tech-Forward UX

Offers branded design, notifications, advanced search, and sorting features.

All-Digital Access

Users can receive, view, and manage mail digitally from any web-enabled device.

What Sets Us Apart

Leverage Our Expertise

Datagain excels in document digitization, creating substantial downstream value for organizations of all sizes and sectors. With over 30 years of experience in managing and digitizing documents and communications, we're ready to deploy our solutions to enhance your operations.
